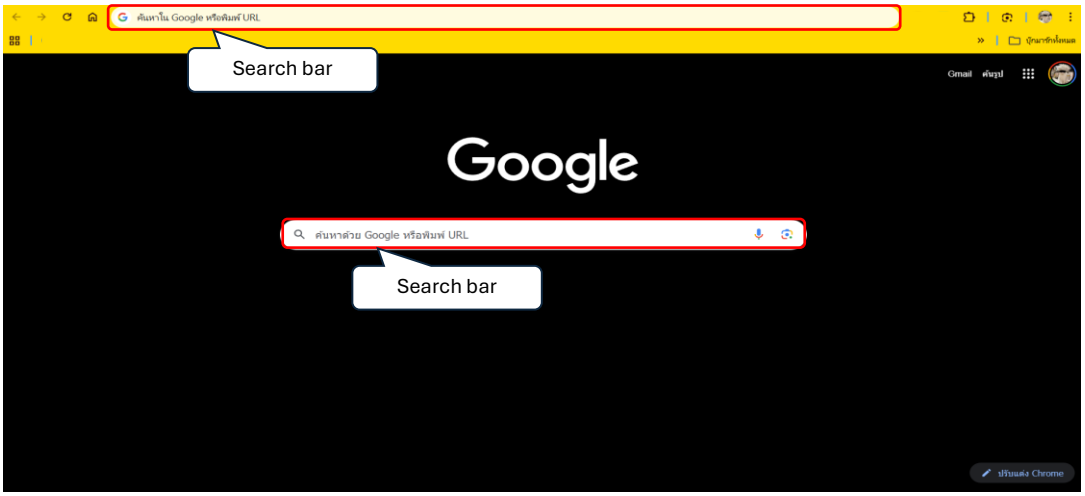
Usage Example
Statistical Data Analysis Report Generation

This document is intended to serve as a user manual for the Website for Generating Statistical Data Analysis Reports.

Accessing the Website



(The homepage of the Google website accessed through a web browser.)

Working Steps

1. Launch a web browser (e.g., Google Chrome).
2. Type the specified URL into the address bar: https://anova-analysis-tool.onrender.com
3. Press the Enter key to access the web application.

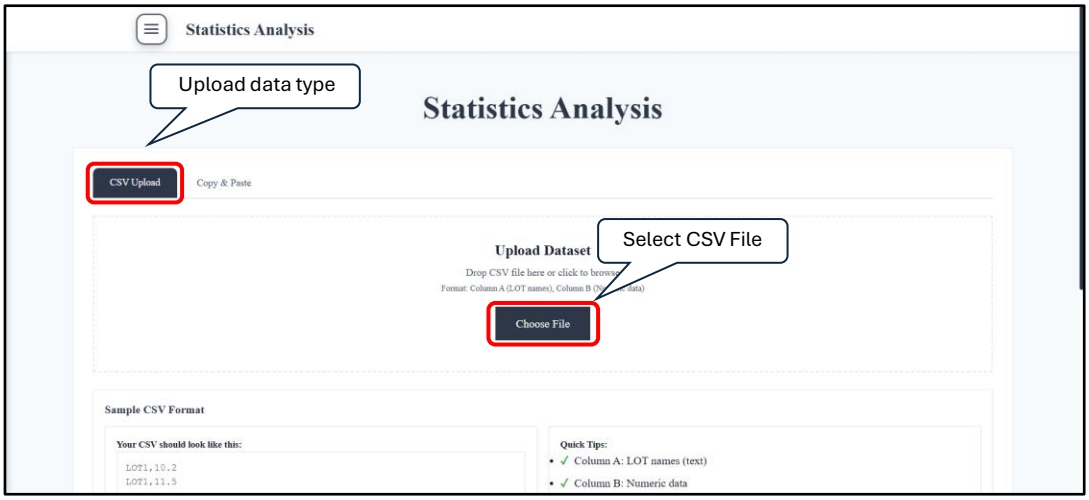
Note

If the website is left unopened for over 15 minutes, it will shut down. If you open it again, you will need to wait a moment.

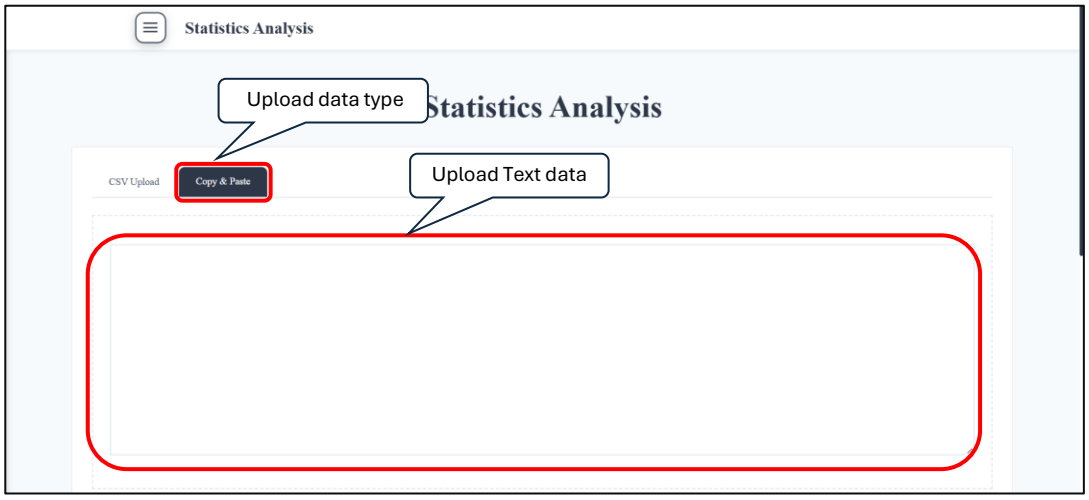
System Menus and Functions

After entering the provided link, you will be directed to the homepage, as illustrated below.

Upload Data Type Menu Description



(Main Page of the Website for Generating Statistical Data Analysis Reports)

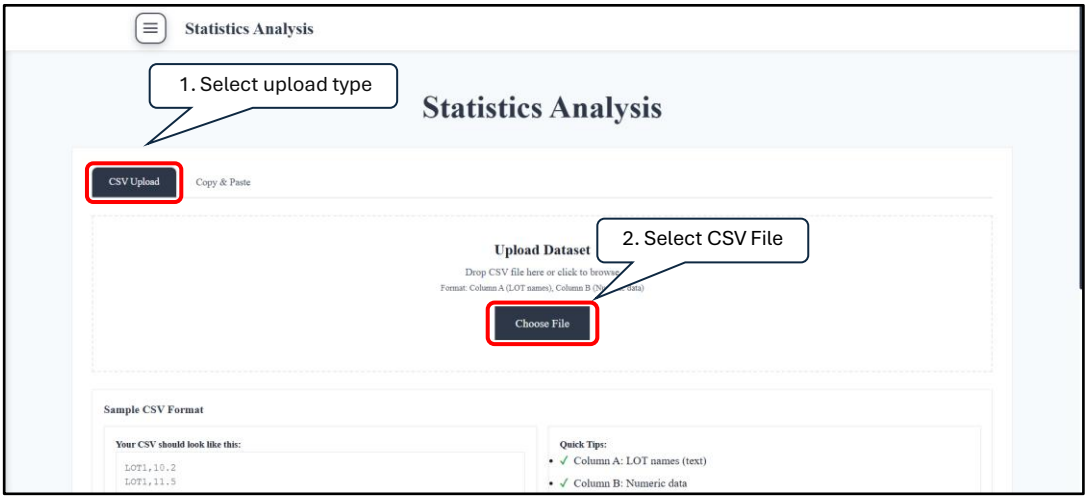


(Main Page of the Website for Generating Statistical Data Analysis Reports)

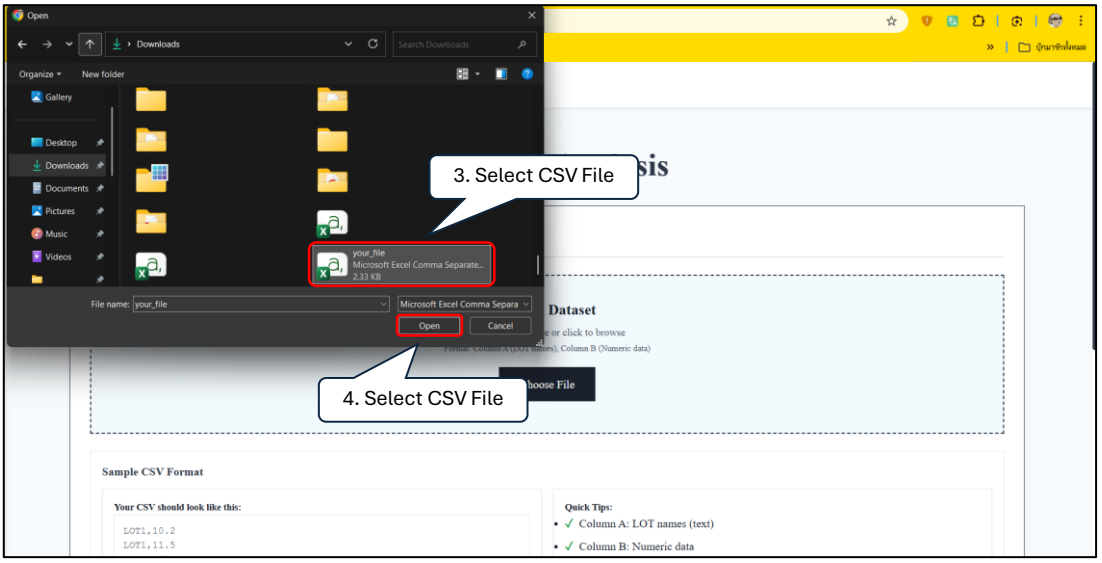
This menu allows users to choose the type of data to upload. There are two available formats, CSV and Text

Data Preparation and CSV File Upload Procedures

How to Upload a CSV File



(Main Page of the Website for Generating Statistical Data Analysis Reports)



(CSV File Upload Interface)

Working Steps

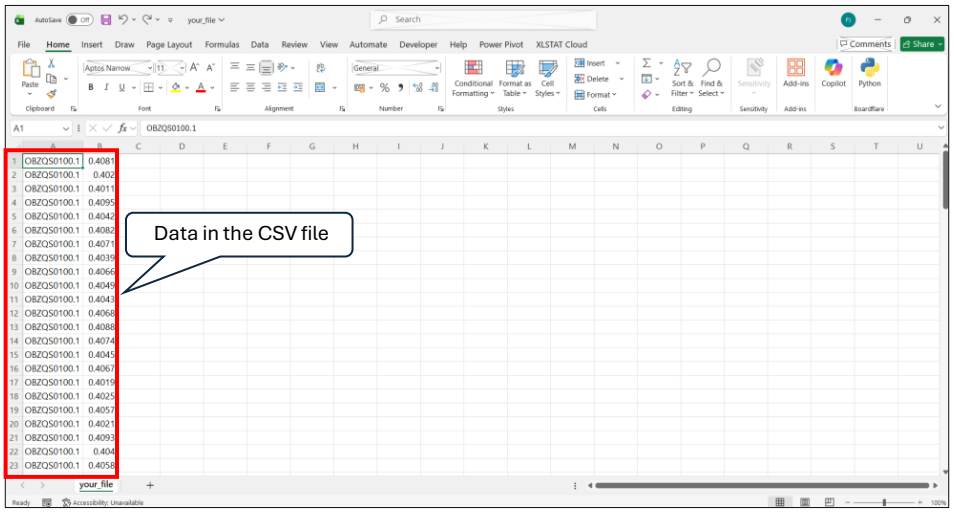
1 .Click the button to upload data as a CSV file.

2. Click the "Choose File" button.

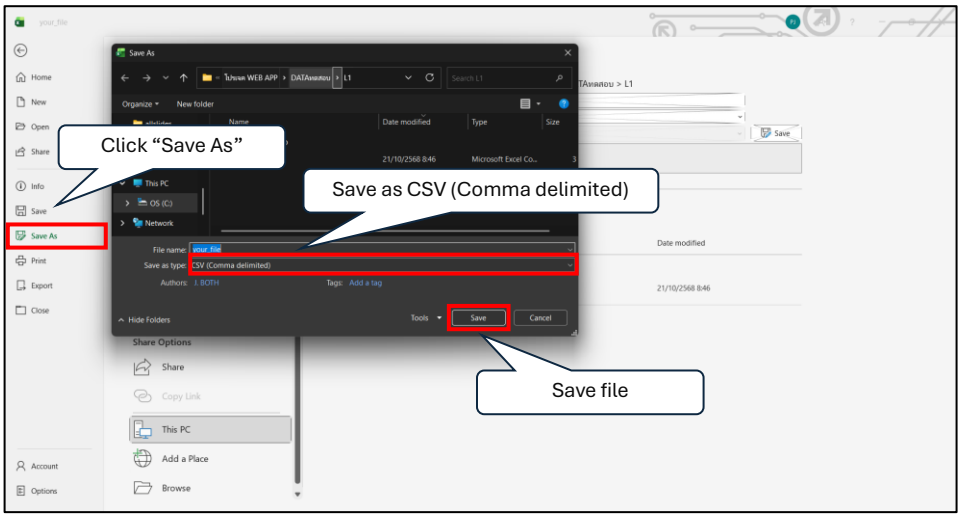
3. Select the CSV file you want to analyze.

4. Click "Open".

CSV Data Format



(Example of Data Input in a CSV File)



(Example of saving a CSV file)

Description

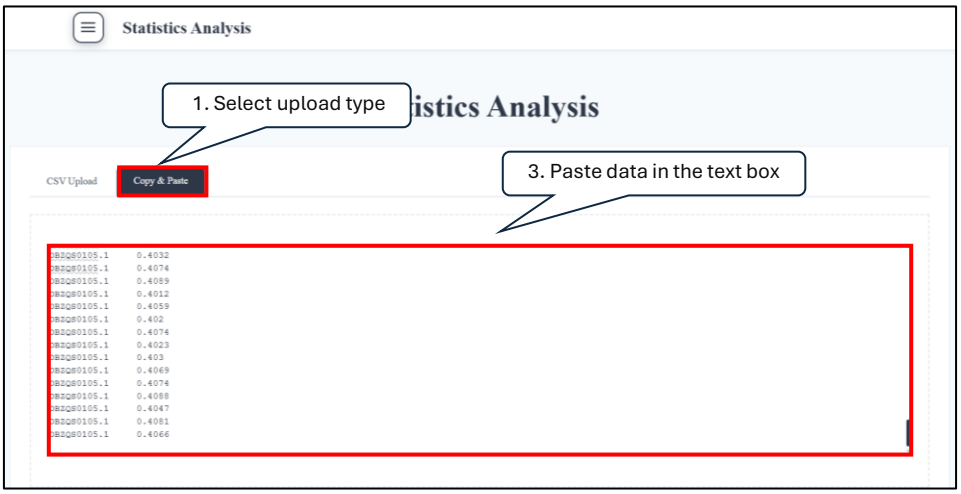
Enter the LOT data in Column A, and enter the DATA in Column B.

Working Steps

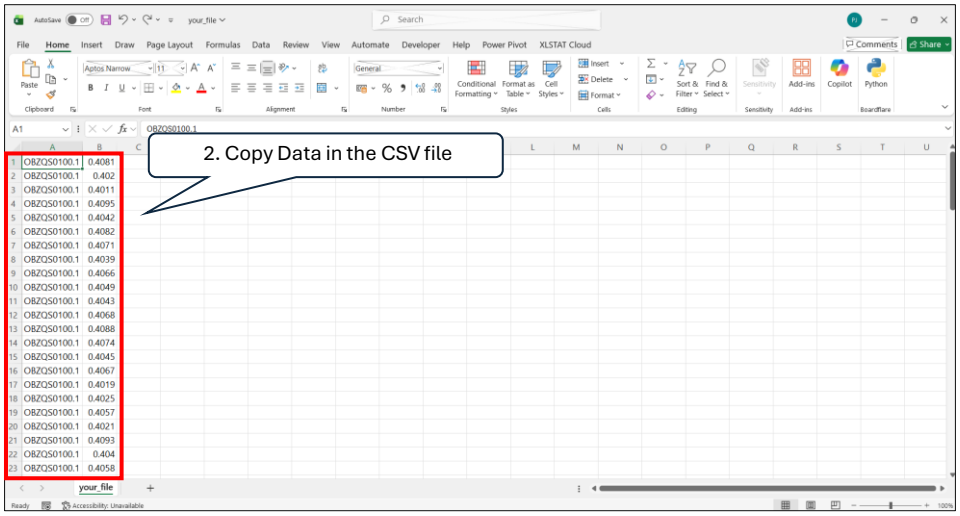
1. In Column A, input the LOT number according to the available data quantity. For instance, if there are 30 data entries for LOT 1, input 'LOT 1' across 30 consecutive rows.
2. Enter the data in Column B to match the corresponding LOT number in Column A. For example, input the data for Lot 1 in the same rows as 'Lot 1' in Column A.
3. Save as a CSV file.

Data Preparation and Text File Upload Procedures

How to input text data



(Main Page of the Website for Generating Statistical Data Analysis Reports)



(Example of Data Input in a CSV File)

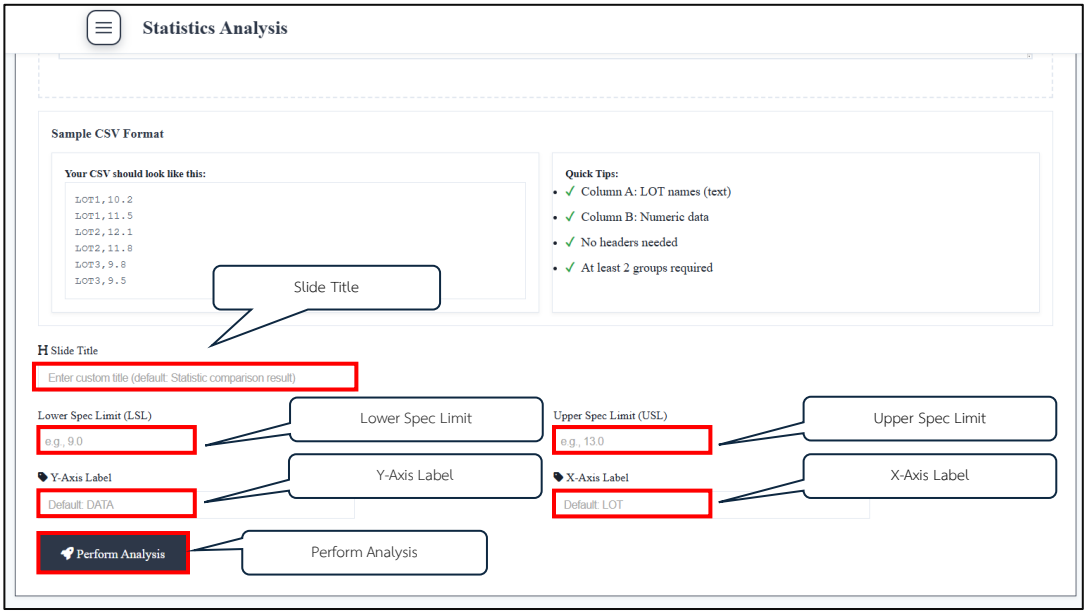
Working Steps

1. Select the TEXT upload method.
2. Copy all data from columns A and B in the CSV file.
3. Paste the data into the text box on the webpage.

Specification Configuration and Data Processing Procedures

System Menus and Functions

After the data upload is complete, scroll down to find the menu for entering the Slide Title and Spec Limit.



(Setting Specification Limits)

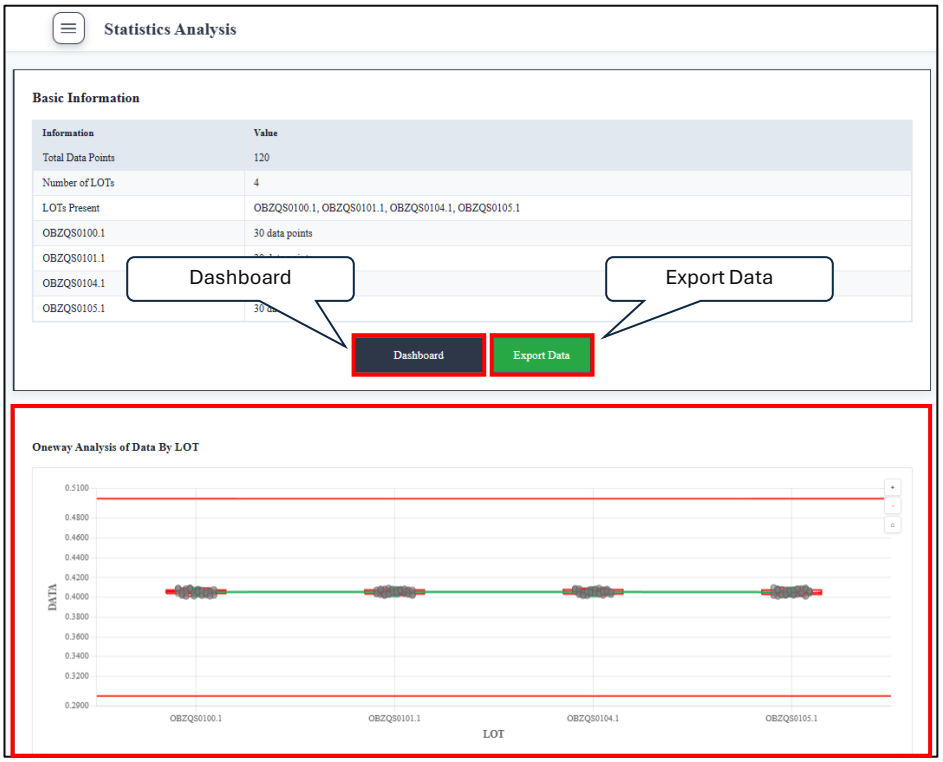
Working Steps

1. Slide Title field: Used for entering the name or characteristic of the data being analyzed.
2. Lower Spec Limit (LSL) field : Used for entering the specified Lower Spec Limit.
3. Upper Spec Limit (USL) field : Used for entering the specified Upper Spec Limit.
4. Y-Axis Label: The title for the vertical axis (Y-axis) on the left side of the chart.
5. X-Axis Label: The title for the horizontal axis (X-axis) at the bottom of the chart.
6. Click the 'Perform Analysis' button.

Data Analysis Results

After the data processing is complete, the results will be displayed on the screen, and two additional function buttons will appear

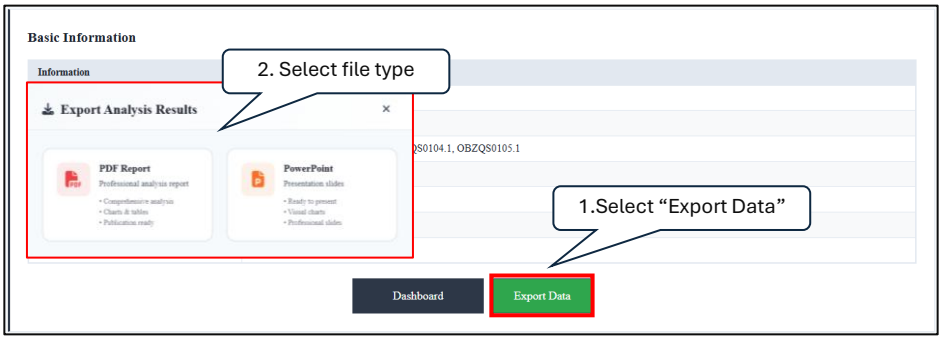
1. Dashboard
2. Export Data



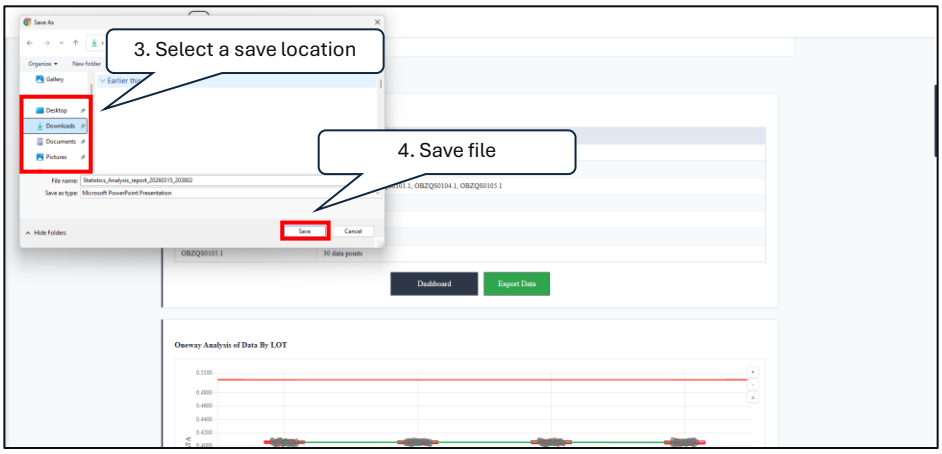
(Data Processing Results Screen)

Report Export Procedures and Dashboard Visualization

How to Export Data



(Dashboard and Export Data Selection Screen)



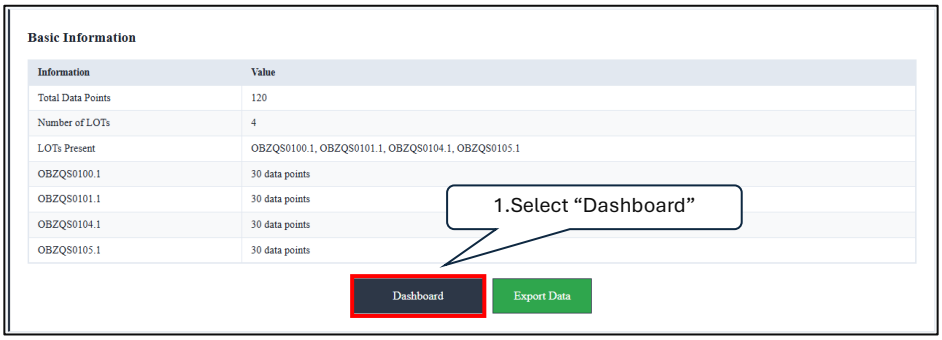
(File Save Screen)

Working Steps

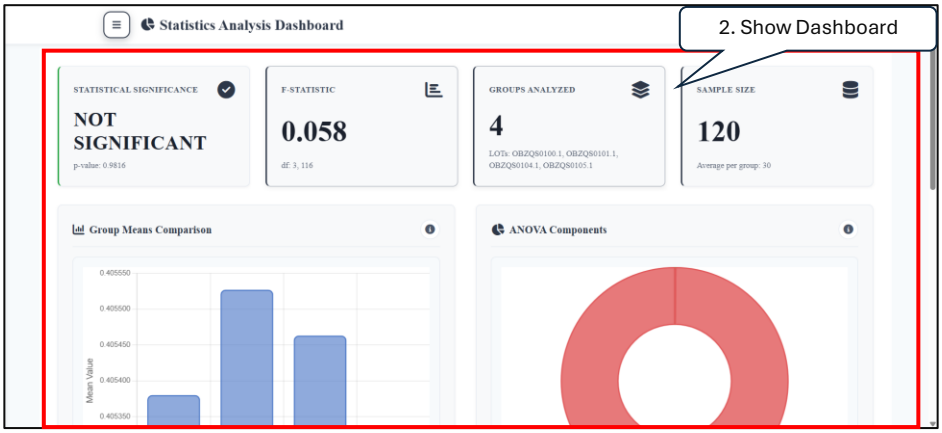
1. Select "Export Data".
2. Choose the file type to export.
3. Choose a save location.
4. Click "Save".

Display the dashboard

After the data processing is complete, you can select the function to view summarized data in a Dashboard format.



(Dashboard and Export Data Selection Screen)



(Dashboard Screen)

Working Steps

1. Select "Dashboard"
2. Dashboard Results Display
